BT W52P IP DECT PHONE.

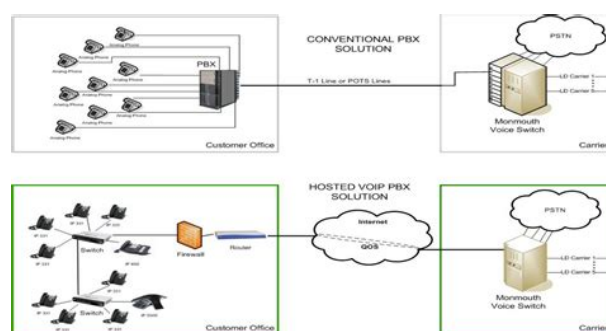

USER GUIDE.

Note Emergency calls to 999 or 112, made via BT Broadband Voice may not work in theFor more information please visit www.bt.com. Offices Worldwide. The services described in this publication are subject to availability and may be modified from time to time. Services and equipment are provided subject to British. Telecommunications plc's respective standard conditions of contract. Nothing in this publication forms any part of any contract. Registered office 81 Newgate Street, London EC1A 7AJ. Registered in England No. 1800000. Hence I need to configure it manually. I found a full user guide on the web here. Kind Regards Plasma The phone is made by Thompson same people who make the BT Home hubs. Thompson Website The usefully provide an Admin Guide which states on page 54. For example i. for user mode. ii. for admin mode. 3 Enter the username by default administrator 4 Enter the password by default 784518 5 Once the process is completed, you can change the settings values to your convenience. Hope that helps others with the same problem. Cheers Plasma Plus, a factory reset option was not an option either, so I monitored the phone traffic upon bootup. I have now found the correct Admin login details Logging in to the phone directly Password 159753 not 784518 as suggested Logging in to the http version on local network Username admin not administrator as suggested Password 159753 not 784518 as suggested I have also found that the user username is indeed user No password required there. Finally there is the Telnet ID user And Telnet Password 789234 I hope this info saves people a lot of time. Best wishes Jimmy Phone hacker The telnet userid is admin, not user. user doesnt work The password for admin is 789234 The rest of Jimmys post is spot on, and has indeed saved me a lot of time. Robert However, i flashed all my Thompson TB30 to SIP since i wanted to use them on Asterisk server. All working great!! Strong phones and feels like Alcatel.
