In the device options, click Language. For more information, contact your wireless service provider or administrator. For more information about wireless coverage indicators, see the printed documentation that came with your device. Turn off a wireless connection You should turn off wireless connections in certain places, such as on an airplane or in a hospital. For more information, contact your wireless service provider. If you want the device to stay turned off until you press the Power key, click Full Power Off. Click Unlock. Type your device password. Press the Enter key. On the Home screen or in the application list, click Keyboard Lock. Change a password in the password keeper 1. In the password keeper, highlight a password. 2. When content protection is turned on, your device uses a private key to encrypt data as it is stored on the device, including data that your device receives when it is locked. Your device decrypts data as you access it. When content compression is turned on, your device compresses all device data, including messages, contacts, calendar entries, tasks, and memos. The tests should run automatically when your device restarts. Verify security software 1. In the device options, click Security Options. When smart password entry is turned on, your device is designed to remember the format of a password that you type in a password field. For more information about software tokens, contact your administrator.

For example, a stock price application might need to connect to the Internet to retrieve the latest stock prices. You might have to set the APN that the thirdparty application uses for this connection. Device Settings. During the game, capsules fall from the bricks that you destroy. The capsules provide you with different mechanisms for destroying bricks or controlling the ball or paddle. When you hit the ball with your paddle 50 times on any level, the bricks descend one space every few seconds. Check the high scores on the BrickBreaker web site 1. In BrickBreaker, press the Menu key. 2. Click High Scores. If an administrator has set an option for you, a red lock indicator appears beside the option field. If you are not in a wireless coverage area, your device should send messages when you return to a wireless coverage area. Typing troubleshooting I cannot check spelling You can only check spelling in English, French, German, Italian, and Spanish. If diagonal lines appear for a long period of time, verify that your device is connected to the wireless network. The device

vibrates until the caller or the wireless network ends the connection. For more information, contact your wireless service provider or administrator. If you cannot connect to the wireless network or access services such as email messaging, your wireless service provider or administrator might ask you to run and submit a diagnostic report. If you want to specify a recipient each time that you submit a report, do not set the default recipient.
