### 1000/1500 Series Riding Tractors

**NOTE:** These materials are for use by trained technicians who are experienced in the service and repair of outdoor power equipment of the kind described in this publication, and are not intended for use by untrained or inexperienced individuals. These materials are intended to provide supplemental information to assist the trained technician. Untrained or inexperienced individuals should seek the assistance of an experienced and trained professional. Read, understand, and follow all instructions and use common sense when working on power equipment. This includes the contents of the product's Operator's Manual, supplied with the equipment. No liability can be accepted for any inaccuracies or omissions in this publication, although care has been taken to make it as complete and accurate as possible at the time of publication. However, due to the variety of outdoor power equipment and continuing product changes that occur over time, updates will be made to these instructions from time to time. Therefore, it may be necessary to obtain the latest materials before servicing or repairing a product. The company reserves the right to make changes at any time to this publication without prior notice and without incurring an obligation to make such changes to previously published versions. Instructions, photographs and illustrations used in this publication are for reference use only and may not depict actual model and component parts.

If a spark arrester is used, it should be maintained in effective working order by the operator. In the State of California the above is required by law Section 4442 of the California Public Resources Code. Other states may have similar laws. Federal laws apply on federal lands. A spark arrester for the muffler is available through your Cub Cadet dealer or contact the service department, P.O. Box 361131 Cleveland, Ohio 441360019. Read and follow all instructions in this manual before attempting to operate this machine. Failure to comply with these instructions may result in personal injury. When you see this symbol—heed its warning. Page 4. Follow the manufacturer's recommendations for wheel weights or counterweights to improve stability. 5. Use extra care with grass catchers or other attachments. These can change the stability of the machine. 6. Keep all movement on the slopes slow and gradual. Do not make sudden changes in speed or direction. Rapid engagement or braking could cause the front of the machine to lift and rapidly flip over backwards which could cause serious injury. 7. Avoid starting or stopping on a slope. Page 5 lockopen device. e. Extinguish all cigarettes, cigars, pipes and other sources of ignition. f. Never fuel machine indoors. g. Never remove gas cap or add fuel while the engine is hot or running. Allow engine to cool at least two minutes before refueling. h. Never over fill fuel tank. Fill tank to no more than. Page 6 For safety protection, frequently check components and replace immediately with original equipment manufacturer's O.E.M. parts only, listed in this manual. "Use of parts which do not meet the original equipment specifications may lead to improper performance and compromise safety!" 12. Do not change the engine governor settings or overspeed the engine. The governor controls the maximum safe operating speed of the engine. 13. Maintain or replace safety and instruction labels, as necessary. 14.

[www.eviinstall.com/userfiles/files/04-civic-service-manual.pdf](http://www.eviinstall.com/userfiles/files/04-civic-service-manual.pdf)

Page 7 SECTION 2 SLOPE GAUGE OR A CORNER OF A BUILDING OR A FENCE POST PE S A. Unthread the fuel cap by turning it counterclockwise. Use only clean, fresh under 30 days old, unleaded gasoline. Fill tank to no more than four inches below the top of the filler neck to allow space for fuel expansion. Page 10 Throttle Control Lever The throttle control lever is located on the left side of the tractor's dash panel. This lever controls the speed of the engine. When set in a given position, the throttle will maintain a uniform engine speed. Ignition Switch Module Fast Position WARNING Never leave a running machine unattended. Always disengage PTO, move shift lever into neutral position, set parking brake, stop engine and remove key to prevent unintended starting. Page 12 SECTION 5 OPERATING YOUR LAWN TRACTOR WARNING Use extreme caution while operating the tractor in the REVERSE CAUTION MODE. Always look down and behind before and while backing. Do not operate the tractor when children or others are around. Stop the tractor immediately if someone enters the area. Select the height position of the cutting deck by placing the deck lift lever in any of the six different cutting height notches on the right fender. To change the direction of travel to reverse when operating with cruise control, depress the brake pedal to disengage the cruise control and bring the tractor to a complete stop. Then slowly depress the rear portion of the drive pedal with the ball of your foot to travel in reverse. After the first two laps, reverse the direction to throw the discharge to the outside for the balance of cutting. This will give a better appearance to the lawn. Do not cut the grass too short. Short grass invites weed growth and yellows quickly in dry weather. Mowing should always be done with the engine at full throttle. See Figure 10. Retighten the two lock nuts against the inner hex nuts when proper adjustment is achieved.

Page 18 Parking Brake Adjustment WARNING Never attempt to adjust the brakes while the engine is running. Always disengage PTO, stop engine and remove key to prevent unintended starting. If the tractor does not come to a complete stop when the brake pedal is completely depressed, or if the tractor's rear wheels can roll with the parking brake applied, the brake is in need of adjustment. The brake disc can be found on the right side of the transmission in the rear of the tractor. Adjust if necessary as follows. WARNING Before performing any maintenance or repairs, disengage PTO, set parking brake, stop engine and remove key to prevent unintended starting. Severe engine damage could result from failure to do so. Fill the crankcase until the oil level reaches the full F mark on the dipstick Refer to Figure 14 on Page 19. The paper element should be replaced at least every 100 hours of operation. Replace more frequently if the tractor is operated under extremely dusty conditions. Check the gap using a feeler gauge and adjust, if necessary, by carefully bending the ground electrode. See Figure 15. Set the spark plug gap to .76 mm 0.030 in.. IMPORTANT Make certain the tractor's discharge chute is directed AWAY from your house, garage, parked cars, etc. Feeler Gauge 2. Disengage the PTO Blade Engage, set the parking brake and stop the engine. 3. Page 23 Lubrication Carburetor WARNING Before lubricating, repairing, or inspecting, always disengage PTO, set parking brake, stop engine and remove key to prevent unintended starting. NOTE Carburetor adjustments should be made only after the engine has warmed up. The engines on Cub Cadet Series 1000 tractors are equipped with a fixed main jet carburetor. Engine Carburetors are equipped with a idle speed adjustment screw and a low idle fuel mixture screw. Page 24 3. Low Idle Speed Setting Place the throttle control into the "idle" or "slow" position.

Check the fuel lines and fuel pump for restrictions or faulty components, replace as necessary. Place a block of wood between the center deck housing baffle and the cutting blade to act as a stabilizer. See Figure 20. Hex Flange Nut Wood Block The recommended operating tire pressure is approximately 10 psi for the rear tires and 14 psi for the front tires. Refer to the tire sidewall for exact tire manufacturer's recommended or maximum psi. Do not overinflate. Page 26 Battery Cutting Deck Removal The battery is sealed and is maintenancefree. Acid levels cannot be checked and fluid can not be added. Page 27 Hydrostatic Transmission Changing the Deck Belt Keep the area around the transmission cooling fan free of grass and debris at all times. The hydrostatic

transmission is sealed at the factory and is maintenance free. The fluid level cannot be checked and on most models, cannot be changed. **WARNING** Be sure to shut the engine off, remove ignition key, disconnect the spark plug wires and ground against the engine to prevent unintended starting before removing the belts. See Figure 24. To ease in removing the belt in later steps, loosen, but do not remove, the bolt which secures the pivoting idler pulley to the idler bracket. To empty the system, run the engine until the tank and system are empty. **WARNING** Allow engine to cool. Extinguish cigarettes, cigars, pipes, and other sources of ignition prior to draining fuel. Drain fuel only into an approved container outdoors, away from an open flame. Page 31 SECTION 11 MAINTENANCE LOG Please keep a record of the maintenance performed on your tractor. Parking brake not engaged. Spark plug wires disconnected. Throttle control lever not in correct starting position. Choke not activated Fuel tank empty, or stale fuel. Blocked fuel line. Faulty spark plug. Engine flooded. Unit running with CHOKE activated. Spark plug wires loose. Blocked fuel line or stale fuel. Place knob in disengaged OFF position. Engage parking brake.

See your Cub Cadet dealer or the retailer from which you purchased your tractor for information regarding price and availability. **NOTE** Cub Cadet Series 1000 lawn tractors are NOT designed for use with any type of groundengaging attachments e.g. tiller or mulboard plow. Use of this type of equipment WILL void the tractor's warranty. In California, new lawn mower must be designed, built and equipped to meet the State's stringent antismog standards. Page 37 KOHLER CO. FEDERAL AND CALIFORNIA EMISSION CONTROL SYSTEMS LIMITED WARRANTY UTILITY AND LAWN AND GARDEN ENGINES The U.S. Environmental Protection Agency EPA, the California Air Resources Board CARB, and Kohler Co. For California, engines produced in 1995 and later must be designed, built and equipped to meet the state's stringent antismog standards. Please see the operator's manual for information on required maintenance and service intervals. PayPal is the only accepted form of payment, Any other payment must be cleared by email. Items will be shipped USPS Priority Mail in United States or USPS First Class International. To combine shipping all items must be paid for together and will be done automatically using eBay checkout. Items paid for separately will be shipped separately. Items will not ship until paid for. Full of info showing how to properly operate several models. Also has parts diagrams.
